Steven W. Walton, AIA assoc., ASID

“ Steve’s vision and skills are incredible. Still, his most impressive traits are his warm personality, his genuine excitement about our plans, and his willingness to be involved throughout the project with additional ideas and assistance. ”

-Bruce & Janet B.

“What excites me is to truly connect with my client’s vision and then begin the journey of developing their vision through an organized architectural process that allows their vision to become a reality. When this process is done correctly, the experience for the client feels seamless and fulfilling.”

Steven W. Walton has more than 30 years of professional expertise in the management of residential remodeling and custom home design and construction. Walton began his career with Marrokal back in 1998 and since then has been honored with multiple awards and has been featured in nationally syndicated magazines such as Northern California Home and Garden, San Diego Home and Garden, San Diego Union-Tribune, San Diego Magazine, Woman’s Day, and Qualified Remodeler. Steve’s creativity and high standards of excellence have contributed to his recognition in the remodeling and custom home building industry.

Steve holds a Degree in Architecture and Structural Engineering with high honors from the University of California, Berkeley. As a member of the American Institute of Architects (AIA) and the American Society of Interior Designers (ASID), Steve regularly lectures on the topics of architectural design, space planning and business development. His success can be attributed to his hard work, perseverance and passion for design.

“My ultimate level of satisfaction is seeing my clients actually experience their home after their project has been completed and hearing from them years after the dust has settled about how their home investment has improved their quality of life”.

“ Steve Walton visited our home and sat and talked with us, not just about our remodeling dreams, but who we are—our hobbies, interests and how we enjoy our home. Later the designs reflected those interests including our love for the outdoors and willingness to preserve our patio space as well as ideas that fit within our stated budget. ”

-Michael & Nancy V.

*It all starts by getting to know who you are, your interests, your desires and your dreams. We spend time here because we know if we get to the core of what you are really looking for, we will hit a home run. We call this programming with our clients.*

*We use questionnaires and resources to assist us on getting a handle on your styles, colors, architectural features and most importantly, budgetary goals that are discussed in the programming stage. Marrokal achieves this by providing our clients the flexibility to choose from many different design and budgetary options early on in the design process. This is key to a successful outcome for your project. In most cases with other remodeling or building contractors, you either get a design that you are excited about, but can't afford to build it, or your design is in budget, but doesn't really excite you.*

## Think. Create. Design. Enjoy.

*Marrokal is dedicated to a successful project outcome by providing you an architectural design that brings your vision to life and also meets your budgetary goals allowing you to actually build your DREAM reality.*
