

LIGHT & BRIGHT, OPEN & INVITING

03-13 RESIDENTIAL INTERIOR \$250,000 - \$500,000

PROJECT COST: \$373,191

COMPLETED: MARCH 31, 2020

THE STORY

- The original layout of this first floor interior had wasted space and needed to be reconfigured. The office/loft area was the main unused area (perfect for storage), so we moved over the entry door and made it into a large foyer with steps down to the main living area. By moving the dining room to the center of the remodel, we were able to extend the footprint of the kitchen and thus created a large open concept. Lastly, the existing family room was another space being unused, so we were able to create another bedroom and full bathroom for guests.
