

FRENCH COUNTRY KITCHEN

01-04 RESIDENTIAL KITCHEN \$100,000 - \$150,000

PROJECT COST: \$106,535

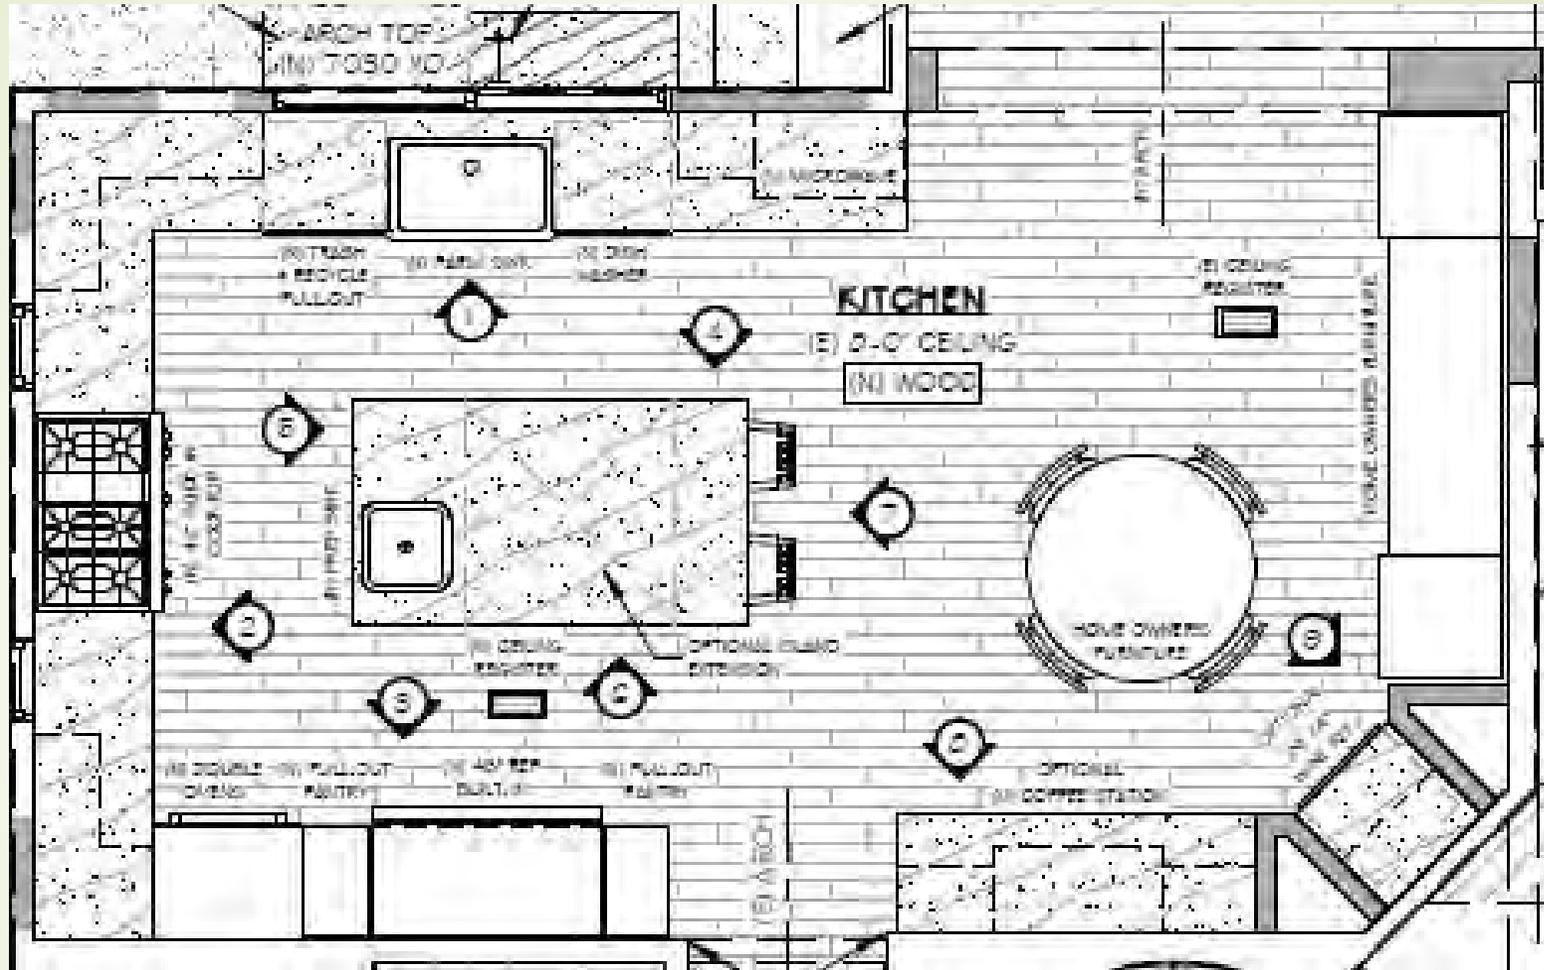

COMPLETED: February 21, 2021

THE STORY

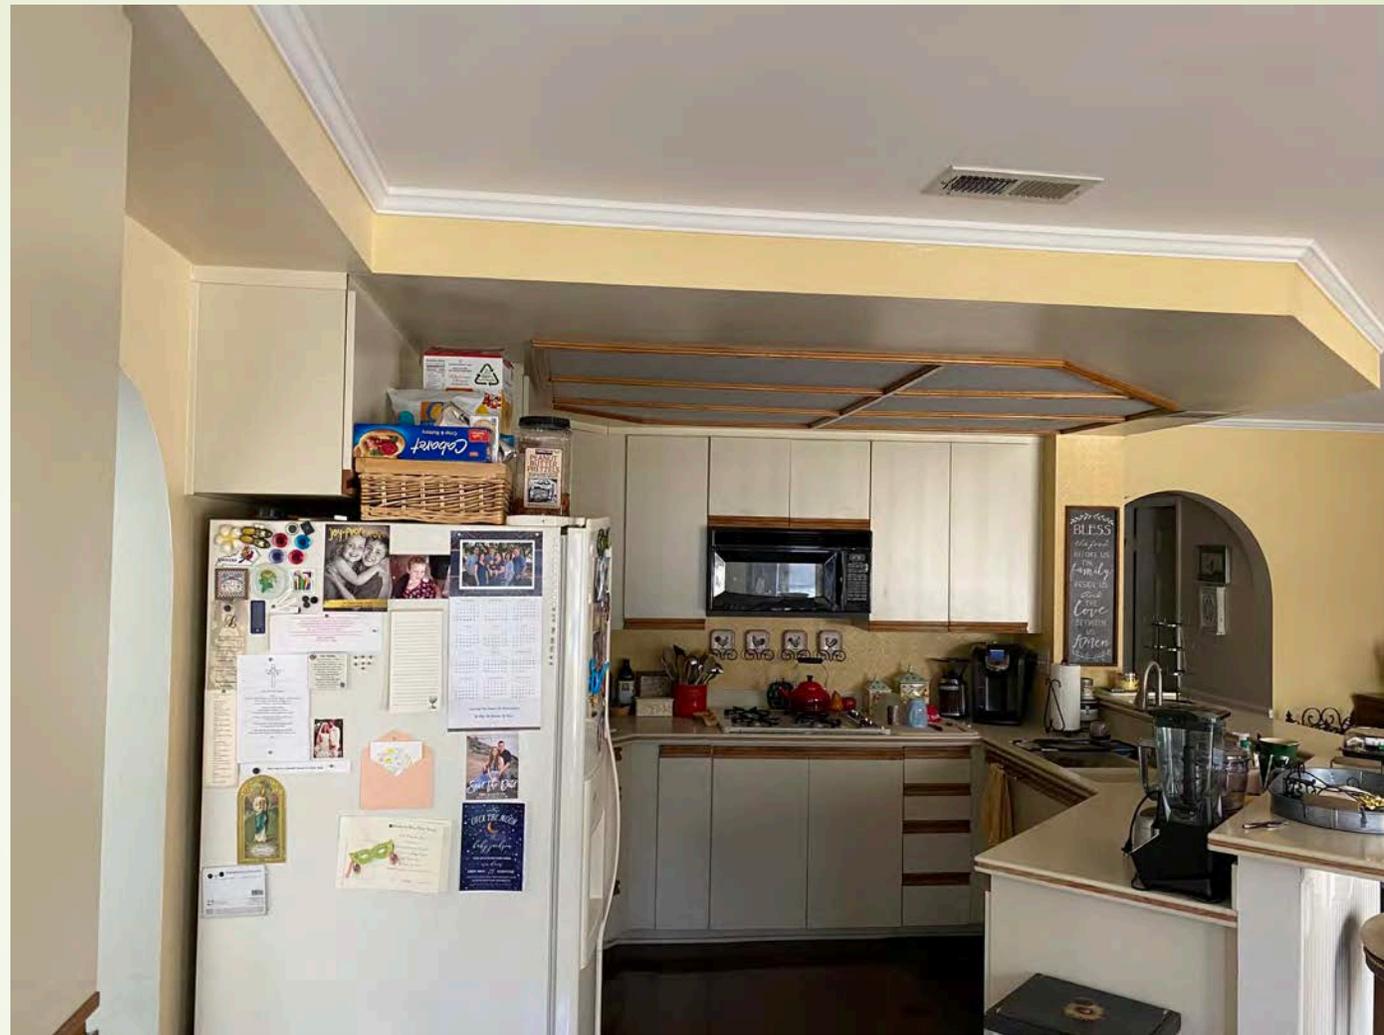

- ▶ Having a large family and loving to cook for the holiday gatherings, my client was desperately in need of a larger kitchen. My client had an existing hutch that was in the dining room that we incorporated into the new kitchen design and installed a new quartzite top as the existing marble was cracked and stained in multiple places. We then demolished the existing fireplace that was rarely used in the dining room and created a kitchen that more than doubled in size equipped with a panel ready fridge, a large range top and a prep sink in the island.
-
