Lic #593914

“ Ability may get you to the top, but it takes character to keep you there. ”

- John Wooden

What Mike brings to his clients is a sense of complete support throughout their entire remodeling project. A Design Consultant's job is to oversee the project every step of the way, and he takes this responsibility very seriously. With over 30 years in the construction industry, he understands the big picture.

*Creativity and vision are very important skills for a design consultant to have, but I think it's even more fundamental to come to clients with a pragmatic and open attitude. I like to listen and help clients shape and refine their ideas into workable solutions, and I pride myself on being responsive and adaptable to change. With me, clients can expect a communicative, organized and respectful consultant who will take ownership of their project from beginning to end.*

Armed with thorough research and unparalleled resources, we put solutions to work. Mike sees around corners for his clients, and he knows that his optimism and confidence will become their own when they see the result of their project. Mike was a licensed contractor for more than a dozen years and he is certified in green building techniques. He has also served on the board of directors for NARI, the local contracting trade group, for two years. In his off hours, he enjoys spending time with his two daughters and coaching varsity high school softball.

Houses For Living, Homes For Life.

# Turn Your Dreams Into Reality.

“Mike was our designer and we consider ourselves very lucky to be able to have worked with him. The time he spent finding out about our lifestyle, likes and dislikes paid off many fold in the final product. He really took the time to find out about us and the design he produced was one that fit us perfectly and he made this a true team effort. In short, we can't say enough good things about Mike, and we consider we have made a new friend.”

- John & Lourdes M.

“All through the design phase as new ideas came up and changes were made, Mike shared our excitement and displayed no signs of frustration whatsoever as we considered different designs. In fact, I would say that far from being stressful, this was the most enjoyable part of the process. All through this, as well, Mike was cognizant of our budget and made sure that we achieved our remodel objective while staying within our financial limits.”

- Amit & Ekta C.

Education continues to be a top priority for Mike, having previously obtained certification as a Green Building Professional. Through continual reading and annual conferences he not only stays current with the latest building products, design trends and techniques; but leads the way, with many of his projects being selected for local and national awards. Many of his projects are featured in Marrokal's extensive YouTube library and he is a regular speaker at the company's complimentary informational seminars.

## Think. Create. Design. Enjoy.

“I take a lot of pride in delivering the whole experience to my clients. Most refer me to others and many call back later with their next project, I am blessed to love what I do.”
