I began my career in the financial industry, but my passion for architecture and construction was evident from a young age. I hold a Bachelor's Degree in Finance from Fairfield University and a Master's Degree in Architecture from the Boston Architectural College. With over 20 years of experience and more than 200 projects completed, I now utilize my expertise to turn my clients' visions into reality—delivering more than they imagined.

Architecture plays a crucial role in shaping the quality of life within a well-designed home, impacting everything from comfort and functionality to mental well-being. Thoughtful design maximizes natural light, ventilation, and spatial flow, creating an environment that feels both inviting and efficient. Ultimately, a home designed with attention to detail and human needs fosters a sense of harmony, improving overall happiness and well-being. I am passionate about architecture and that is why I feel it is so important to explore multiple design solutions to meet clients' goals.

EDUCATION AND CERTIFICATIONS:

BA of Science: Finance
Fairfield University

BA of Science: Information Systems
Fairfield University

Master of Architecture
Boston Architectural College.

American Institute of Architects
Associate Membership

U.S. Green Building Council
LEED Accredited Professional

Certified
Aging-In-Place Specialist (CAPS)

“John listened carefully to our needs and ideas. He offered many suggestions that we were able to incorporate into the existing portions of our home to make it more convenient. We’d like you to know not only how pleased we are with the addition, but also with the creative, focused and attentive leadership you provided us.”

“I wanted to reach out to the team at Marrokal and say thank you for another successful project for us. We are so thankful for John Paratore who has helped us through both projects. He is a big reason we went back to Marrokal on our second project. Thanks again and please consider using us as a reference for customers going forward.”

CLIENT ADVOCATE AND VISIONARY:

I work tirelessly as an advocate for my clients from the first visit at the home until celebrating the completion of the project. Remodeling is a complex process with many variables. Part of the enjoyment for me is thinking outside the box and working with my team to solve design problems.

Having worked on hundreds of projects, I understand the gravity of being trusted with people's homes and significant investment levels. As I help define goals, discuss options and maximize value and efficiency, I am often able to anticipate and mitigate challenges before they arise. When an issue does occur, you can rest assured; working with Marrokal's team, there is always a solution.

AWARDS AND PUBLICATIONS:

Over the years, our projects have received numerous design awards, been featured in newspapers and magazines, and showcased on design tours. While recognition from peers and the media is always appreciated, the true credit belongs to my team and clients. Their vision and our collaborative efforts consistently result in stunning spaces that surpass client expectations.
